

Please be aware that the K-LOVE radio station broadcast on 88.7 in Odessa, Texas serves the local community and residents by providing listeners with pleasant music without commercials as well giving reliable emergency alerts. It is my concern that if K-LOVE were replaced by LPFM this same style and genre of music would not be represented in the local community. Furthermore, it is nice to have a K-LOVE station broadcast in so many cities accross the nation. It makes many places feel like "home". If you've ever had to travel or move, you know how important "home" is. The public is interested in K-LOVE. If not, they would not get their funding. I am personally a supporter and I like to know that I can listen to my favorite music and not miss out on local weather reports/emergencies. This is an important concern, since tornados are not unheard of down here. Thank You Sheri Pursley
